BETTER EDUCATION FOR BETTER SCIENCE

Dear Colleagues

last months had been very challenging for people all around the world and for health care professionals.

Worldwide, the biomedical research community has been called to explore and work in support to clinics; great efforts and projects are still in progress.

In the meantime, scientists and preclinical professionals worked hardly to preserve research quality and guarantee the welfare of the animals in their responsibility.

In this "COVID period" the Scientific Committee has set a new educational offer, providing online resources to enrich the FGB training portfolio.

We are pleased to invite you to give a look to our first online course:

WHAT SHOULD YOU KNOW ABOUT YOUR RODENT FACILITY? 14-15- July, 2020

Through this distance learning event you will appreciate outstanding expertise and will experience interactive sharing and exchange of knowledge; finally, you will have the opportunity to "enter virtually" in an animal facility.

Stay safe and be engaged by FGB online proposals!

During 2020 we will be back with additional opportunities and events.

This two-day on-line course is designed to provide the key aspects for the management of a modern laboratory rodent facility.

Layout & functional areas, bio-containment & bio-exclusion, washing & decontamination, health monitoring concepts will be described with particular attention to new technological developments, scientific needs of research and management concepts.

Theoretical and practical examples will be used to enhance the participants' knowledge and improve their skills on everyday activities developing a critical approach to the choices made daily for the management of the animal care and safety of operators.

Key components in an animal facility

Different functional areas

Workflows of animals, personnel and equipment

Practical examples of a rodent animal facility

Functional areas

Layout

Bio-containment & Bio-exclusion

Definition and meaning

Primary and secondary barriers

Housing systems

From open cage to IVC

Cage change procedures

Pros and Cons of different procedures

Washing

Why, when and how

Decontamination

Why, when and how

Pros and cons of chemical disinfection

Autoclaving

Why, when and how

Cage and bottle cycles

from the Cage's point of view

Health monitoring programmes

Why should we worry about health monitoring?
